Carti 100 Key Features

100 kg Payload

Carti 100 can carry up to 100 kg (220 lbs), providing robust support for heavy lifting tasks.

BEAR Data Privacy Cloud System

Equipped with data privacy protections and a cloud-based remote monitoring system to ensure secure and accessible oversight.

Quick & Easy Installation

Carti 100 uses 3D cameras and LiDAR for quick deployment and seamless system integration.

Multi-Robot Collaboration

Supports collaboration with up to 100 robots simultaneously, enabling efficient and coordinated operations.

IoT & Software Ecosystem

Integrated with a comprehensive IoT and software ecosystem for seamless connectivity and management.

Product of USA

Designed by Bear Robotics in California.

Effortless transport, maximum convenience

Carti streamlines heavy lifting with ease. Designed for quick and efficient movement, it saves time and effort in any setting, making material handling a breeze. Experience hassle-free transport and boost your productivity.
